Introduction

SpacePup was founded in March 2021 by the original SpacePup Community team as a cryptocurrency made by the people for the people. The idea behind SpacePup was to produce a project that has several aspects and ideas to bring forward the opportunity for amazing partnerships, collaborations, and most of all the opportunity to give back money to puppies in need.

There are quite a few aspects to SpacePup that will be discussed in the one of a kind white paper. The project is about donating to puppies across the world. However, there are still opportunities for us the community to get involved and join in at the token farm denoted the “Space Farm”, enter our amazing competition, design your own NFTs, try out our amazing merchandise, and even get children involved by checking out the illustrated book we’ve got instore for everyone!

Don’t forget the opportunities are endless with SpacePup. Reach out as a community member and join in on making this community-driven project a great success. We are all in this together as one massive team!

Tokenomics

The SpacePup ecosystem will comprise of two tokens. The main governing token will be SPUP. The secondary token will be SBONE. Both tokens will be available to purchase in the fair token sale that will commence on the 10th September 2021 and end on the 10th October 2021.

Tokens Minted:

SPUP: 1,000,000,000 (1B)

SBONE: 10,000,000,000 (100B)

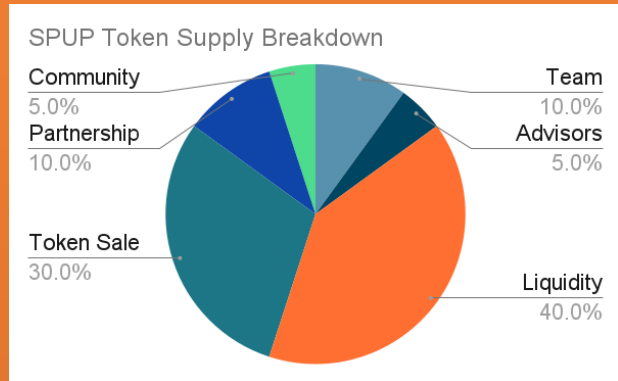

Public Token Sale SPUP: \$0.025

Tokens for Sale: 300,000,000 (300M)

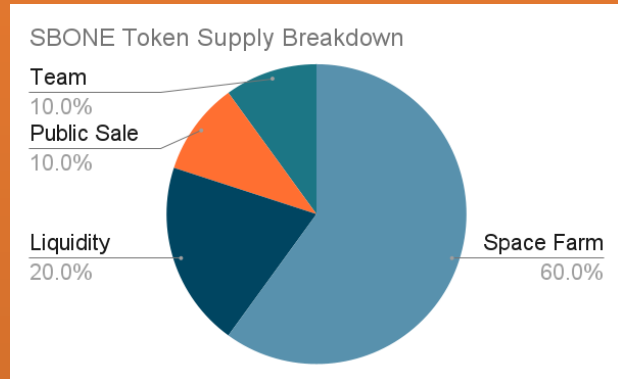

Public Token Sale SBONE: \$0.0008

Tokens for Sale: 10,000,000,000 (10B)

(a)

(b)

SPUP token breakdown can be seen in image (a). The community members will be awarded 5% of the tokens over several years to be a part of the community team and help push the project forward. The core team will have 10% of the tokens, while a further 10% will be solely provided for partnerships. Any tokens not sold in the token sale will be used to push for marketing and partnerships.

SBONE token breakdown can be seen in image (b). The team tokens will consist of 10%. The public sale will consist of 10% tokens which will be a one time sale. A liquidity pool will be created with 20% of the tokens, alongside 70% of the tokens in the Space Farm. These tokens can only be available by staking SPUP tokens.

Space Farm

The exceptional yield farm developed by the community team is to be denoted the “Space Farm.” At the Space Farm members will be able to stake their SPUP tokens in exchange for the precious SBONE tokens. The system is easy to use and you can simply connect your metamask or other compatible wallets to the yield farm and begin staking from the click on a button. Unstaking your tokens can be down just as fast simply, with a smooth transition between the two functions of the processes. Alongside this, you’ll be able to see the amount of SBONE you’ve earned in real-time on the Space Farm.

The branding behind the Space Farm was designed so that our trusted SpacePup mascot could enter his newly cropped farm on space to begin harvesting his SpaceBone crop. It allows users to get involved and help SpacePup by staking their SPUP tokens giving him a boost in getting those precious SBONE tokens from the farm.

The specific information that is involved with the Space Farm are as follows:

- Token Unstake Time: 60 seconds
- Space Farm APY: 100%
- Tokens in the Space Farm: 60,000,000,000 (60B) SBONE

There is no minimum SPUP stake amount required to begin staking at the SpaceFarm. This means you’ll be able to stake as little as 1000 SPUP tokens and receive 888,000 SBONE tokens per year.

NFTs

There will be a whole range of funky, fun, common rare, and ultra-rare NFTs for users to purchase from the OpenSea marketplace. There will be 3 original SpacePup, SpaceBone, and SpaceFood NFTs up for grabs to the top 3 token buys spending more than 20 ETH at the token sale. These NFTs come with excellent benefits for the users who acquire them. Those including:

- 20,000 SPUP tokens every month for 2 years
- 3% earnings on any funds made on special events.

It doesn't end there. There will be 5 more special SpacePup NFTs minted which users can bid for during the token sale period. These NFTs will have awesome designs and be used in some epic games in the near future. Rocco and Randy the special companions to SpacePup will also be minted as NFTs. These two NFTs will include:

- Rocco: 50 Ultra Rare, 100 Super Rare, 500 Common
- Randy: 50 Ultra Rare, 100 Super Rare, 500 Common

The SpacePup brand will also allow users to create their own personalised images. There will be a list of base level images users can use which can have add ons to develop personalised NFT images that can be purchased and sold on the OpenSea marketplace. The rarer the add on you put onto your SpacePup NFT the more it'll be worth. A whole range of common, rare, and ultra rare add ons will be available to use

Road Map

- Official Site Release
- Initial Marketing Campaign
- Public Token Sale SPUP & SBONE
- Launch of the Space Farm
- UniSwap Listing

Q4 2021

- Release of Spacepup Book Series
- KPOP Single Release
- Q1 Charity Donation
- NFT Token Sale
- New Exchange Listing

Q3 2021

- Launch of the SpacePup Merchandise
- Listing on Coingecko
- Listing on CoinMarketCap
- Q4 Charity Donation
- New Partnership Announcement
- New Exchange listing

Q1 2022

Conclusion

In conclusion to the epic idea, we've come up with as a community lets leave you with a few final words of inspiration and motivation. Here at the SpacePup Community Headquarters, we are always looking for new people to in the community to join in and provide their awesome expertise and get things rolling. Remember as a member of the team you can start creating your own ideas and begin utilising those ideas with the click of a few buttons! The journey will be long and perilous for us as a community and Spacepup on his journey across space and time searching for the precious SBONE he's been planning to farm over the year (Several Dog Years). In the end, we will make it and all prosper and reek the rewards from all the hard work that's been and is going to be put into the project.

To further conclude this lengthy conclusion let's all have fun and enjoy the days to come with the SpacePup brand and let's see where this epic project takes us and hope it's to one of the epic moons that has never been seen before!

Purchasing SPUP and SBONE tokens entail several risks to the user who decides to buy tokens. Like any cryptocurrency, there are risks in terms of volatility, liquidity, access to online exchanges and data breaches. Users understand that using the Space Farm and purchasing tokens will not hold the issuers liable for any damages that may occur from any lawful actions undertaken. The lawful action will be determined by the legislation in the form at the jurisdiction of the issuer of the registration.
